## (54) AUTOMATIC ACCOUNTING SYSTEM

### (57)Abstract:

**PURPOSE:** To eliminate the error of change by automatically finding the amount of change, carrying out the change and printing out the amount of change, etc., when payment coins are simultaneously charged.

**CONSTITUTION:** The payment coins are simultaneously accepted, it is checked whether the coins charged from a coin inserting device 1 are forged or not by coin check means 10 and 11, afterwards, the charged payment amount is obtained from the coins and a prepaid card, and these coins are stored in a change dispenser 15 by denominations. On the other hand, a total amount is calculated from bar code data, the change amount is found from this total amount and the charged payment amount and bar code data, total amount data and change amount data, etc., are received and printing out by a printer 33. Thus, the change and a receipt can be carried out automatically and there is no error at the time of coin exchange.
